Efficacy and Safety of Mirogabalin (DS-5565) for the Treatment of Diabetic Peripheral Neuropathic Pain

Both gabapentin and pregabalin are generally used as first-line treatments for diabetic peripheral neuropathic pain, but mirogabalin has shown promise as a potential treatment for diabetic peripheral neuropathic pain. This study has been designed to determine the safety and efficacy of mirogabalin so as to improve the management of chronic pain for people with diabetic neuropathy.
